ABOUT ME

I'm currently in my third year of Computer and Communication Engineering at the Lebanese University's Faculty of Engineering in Beirut. My main academic goal is to become a skilled engineer in telecommunications, robotic systems, and energy-related technologies.

I am excited about the opportunity to apply for the Summer Internship 2025 to broaden my knowledge, contribute to impactful energy projects, and connect with industry experts in the field of sustainability.

EXPERIENCE

Solar Panel Installation Project

Marvel Tech | West Bekaa, Lebanon

2022 - Present

- Installed wall-mounted solar panels alongside a team.
- Gained technical knowledge about solar technology and energy systems.

EDUCATION

Computer and Communication Engineering

Lebanese University Faculty of Engineering | Beirut

2022 - Present

Key Projects:

- **Library Management Application (C#, OOP, SQL)**
 - Designed a GUI application to manage books and members in a library
 - Gained skills in object-oriented programming, database design, and user-interface development
- **Arduino-Based Smart System (Traffic, Street lighting, Waste Management)**
 - Integrated sensors (temperature, light, motion) to control city services efficiently
 - Experience in IoT, automation, real-time data collection, and energy optimization
- **Labs:**
 - Electrical machines: control methods, power distribution, and motor applications
 - Electronic circuits: designing, prototyping, and testing circuits
 - Microprocessors: developing and debug code to control hardware components
 - LabVIEW: graphical programming for automation and control, useful in developing industrial control systems

SKILLS

Practical: AutoCAD, Proteus, Excel, LabVIEW, MATLAB, ARDUINO, Word, PowerPoint

Programming: C, C#, IoT

Soft Skills: Teamwork, problem-solving, adaptability, strong willingness to learn

LEADERSHIP

Class Representative — Lebanese University, Faculty of Engineering | Beirut

2022–Present

- Elected by fellow students to represent their interests and voice their concerns
- Served as a liaison between professors and students, organizing meetings, addressing issues, and strengthening communication
- Gained leadership, communication, and problem-solving skills, valuable for collaborative projects and team initiatives
