1. Welcome & Company Overview

Welcome Message

Welcome to **CedrusTech Solutions**. We are excited to have you as part of our growing technology company. CedrusTech Solutions is committed to innovation, professionalism, and continuous improvement in the fields of software development, artificial intelligence, business automation, and digital transformation.

This handbook is designed to help employees, interns, and team members understand our company culture, policies, procedures, and expectations. It also provides guidance about employee rights, responsibilities, workplace behavior, and opportunities for professional development.

Employees are encouraged to carefully review this handbook and contact Human Resources for any clarification or assistance.

About CedrusTech Solutions

CedrusTech Solutions is a Beirut-based software and artificial intelligence company specialized in delivering smart business solutions for modern organizations. The company develops advanced systems that combine software engineering, artificial intelligence, data analytics, cybersecurity, and cloud technologies to improve business efficiency and decision-making.

The company works with businesses, educational institutions, startups, and organizations seeking customized digital solutions and intelligent automation systems.

Our Mission

To provide innovative software and AI-powered solutions that help businesses improve productivity, automate operations, optimize decision-making, and grow successfully in the digital era.

Our Vision

To become one of the leading software and artificial intelligence solution providers in Lebanon and the Middle East, recognized for innovation, reliability, customer success, and technological excellence.

Our Core Values

Innovation

We encourage creativity, research, and modern technological thinking to build intelligent business solutions.

Integrity

We conduct all business activities honestly, ethically, and professionally.

Collaboration

We believe teamwork, communication, and cooperation are essential for success.

Excellence

We strive for quality, accuracy, and high professional standards in every project.

Customer Success

We focus on helping our clients achieve measurable growth and operational improvement.

Company History

CedrusTech Solutions was established in Beirut, Lebanon, to develop intelligent software systems and AI-powered business technologies. Since its foundation, the company has focused on combining artificial intelligence with practical business applications.

The company has developed projects in:

- AI-powered HR systems

- Risk prediction systems
- Intelligent chatbot platforms
- Business automation software
- Employee management systems
- Database management solutions
- Web and cloud-based applications
- Cybersecurity and IT solutions

CedrusTech Solutions continues to expand its expertise through innovation, research, and continuous technological development.

Organizational Structure

CedrusTech Solutions operates through several specialized departments:

- Executive Management
- Human Resources Department
- Software Development Department
- Artificial Intelligence & Data Analytics Department
- Cybersecurity Department
- Database Management Department
- IT Support & Infrastructure Department
- Web & Mobile Application Development Department
- UI/UX Design Department
- Sales & Client Relations Department
- Digital Marketing Department
- Finance & Administration Department
- Project Management Department

- Research & Innovation Department

Each department works collaboratively to support company operations, client projects, and business growth.

2. Company Services & Technology Solutions

CedrusTech Solutions provides modern digital solutions designed to improve organizational efficiency and automate business processes.

The company specializes in:

- Artificial Intelligence Systems
- HR Management Platforms
- Risk Prediction & Analytics
- Business Automation Software
- Intelligent Chatbots
- Database Systems
- Cloud Applications
- Cybersecurity Solutions
- Website & Mobile Application Development
- Data Analytics Dashboards

The company develops customized systems tailored to client requirements and industry needs.

3. Services

Company Information Assistance

Visitors can ask the AI chatbot questions about CedrusTech Solutions, including the company's mission, services, departments, values, technologies, office location,

and organizational structure. The chatbot acts as a virtual company assistant that provides instant information to website visitors.

Service & Solution Information

The chatbot can explain company services such as AI-powered HR systems, predictive analytics, cybersecurity solutions, chatbot development, and business automation systems. It helps potential clients understand how CedrusTech Solutions improves operational efficiency through technology.

Internship Information

Students and graduates can ask the chatbot about internship opportunities, application requirements, available departments, internship duration, and learning opportunities.

CedrusTech Solutions offers a structured three-month unpaid summer internship program that provides practical industry experience for students in different departments.

Career Opportunities

The chatbot can provide information about available jobs, recruitment requirements, technical skills, interviews, and employment procedures.

Technical Support

Clients can use the chatbot for software assistance, troubleshooting guidance, account support, and technical issue reporting.

AI & Technology Projects

Visitors can ask about artificial intelligence projects, machine learning systems, risk prediction technologies, and software engineering solutions developed by the company.

Contact & Communication

The chatbot can provide:

- Office location in Beirut
 - Company contact information
 - Working hours
 - Department contacts
 - Appointment scheduling support
-

4. Internship Program

CedrusTech Solutions offers a structured Summer Internship Program designed for university students and recent graduates seeking practical industry experience in software and business technologies.

The internship program:

- Runs for 3 months during summer
- Is currently unpaid
- Provides real-world project experience
- Includes mentorship and training
- Allows interns to work with professional teams

Interns gain practical experience in:

- Software Development
- Artificial Intelligence & Data Analytics

- Human Resources
- Cybersecurity
- IT Support
- Web & Mobile Development
- UI/UX Design
- Database Management
- Digital Marketing
- Project Management

The internship program aims to develop technical, analytical, communication, teamwork, and professional skills.
